PROFESSIONAL SUMMARY

Full Stack Developer with hands-on experience building responsive web applications using the MERN stack and AI-powered integrations. Skilled in developing scalable frontend interfaces, backend APIs, authentication systems, and database-driven applications. Passionate about solving real-world problems through modern web technologies and continuously expanding expertise in full-stack engineering and AI-enabled systems.

SKILLS

Languages: Python, JavaScript (ES6+), TypeScript, HTML5, CSS3, SQL
Frontend: React.js, React 19, Bootstrap, Responsive Design, Flexbox, CSS Grid, Interactive Dashboards
Backend: FastAPI, Flask, Node.js, Express.js, REST APIs, SQLAlchemy Async
Databases: PostgreSQL, MongoDB, SQL, Alembic
AI & LLMs: Google Gemini API, GPT APIs, Prompt Engineering, Conversational AI, Structured AI Analysis, Pydantic Schemas
Voice Agents & Automation: Voiceflow, Intent Detection, Knowledge Base Search, API Integration, Lead Qualification Automation
Tools & Platforms: Git, GitHub, VS Code, Docker Compose, Firebase, Vercel, Render
Libraries & Integrations: pypdf, HTTPX, pydantic-settings, JWT Authentication

EDUCATION

AISSMS Institute of Information Technology, Pune *2023 – 2027*
B.Tech in Electronics and Telecommunication Engineering **CGPA: 8.05**

Higher Secondary Certificate (HSC) *2021 – 2023*
Percentage: **72%**

Secondary School Certificate (SSC) *2019 – 2021*
Percentage: **98.7%**

EXPERIENCE

Full Stack Engineer Intern – ViksitHub *Oct 2025 – Mar 2026*
viksithub.in Pune, India

- Contributed to the development of a startup ecosystem platform connecting verified startups, investors, mentors, and job seekers.
- Built responsive frontend components using React.js and implemented backend APIs using Node.js and Express.js.
- Worked with MongoDB and Firebase services for authentication, data handling, and scalable application workflows.
- Assisted in integrating AI-powered features and optimizing user experience across the platform.
- Collaborated with the development team using Git and GitHub for version control and feature deployment.

PROJECTS

Manav Swasthya – AI-Based Mental Health Analysis Platform

- Developed an AI-assisted mental health assessment platform using Python, Flask, JavaScript, and GPT APIs.
- Implemented real-time analysis of facial expressions, speech patterns, and typing behavior to evaluate mental wellness indicators.
- Built backend processing pipelines and interactive dashboards for visualizing user health insights.
- Generated personalized recommendations and wellness suggestions based on AI-driven analysis.

AI-Powered Cleaning Service Voice Agent – Conversational AI Automation

- Built a Voiceflow-based AI voice agent for customer support, service inquiries, and lead qualification.
- Automated quote requests by collecting property type, square footage, and customer requirements.
- Implemented intent detection, knowledge base search, and AI-generated responses for customer questions.
- Developed an instant quote system to generate cleaning estimates for houses and apartments.
- Captured customer details, validated contact information, and automated lead collection through API integration.
- **Tech Stack:** Voiceflow, Knowledge Base, API Integration, Prompt Engineering, Conversational AI.

AI Career Copilot – Resume and Career Intelligence Platform

- Developed a full-stack AI career analysis platform using FastAPI, React 19, TypeScript, PostgreSQL, and Google Gemini API.
- Built an asynchronous backend using FastAPI, SQLAlchemy Async, and PostgreSQL to manage resumes and user profiles.
- Integrated Google Gemini 2.5 Flash with Pydantic schemas for structured JSON-based resume analysis.
- Implemented resume strength analysis, weakness detection, missing skill identification, and career improvement suggestions.
- Built non-blocking GitHub API integrations using HTTPX to parse profile statistics and compute a custom Developer Activity Score.
- Created a responsive React dashboard with interactive SVG circular gauges to visualize career metrics.
- Containerized database configurations using Docker Compose and managed developer secrets with pydantic-settings.
- **Tech Stack:** FastAPI, React 19, TypeScript, PostgreSQL, Alembic, Google Gemini API, pypdf, HTTPX, Docker Compose.

CERTIFICATIONS MERN Stack Development – Apna College
Data Structures and Algorithms – Apna College

ACHIEVEMENTS Runner-Up – Techathon 2025 National Level Hackathon
Built multiple full-stack and AI-integrated applications during undergraduate studies.
